

Alaska Healthcare Roadmap

Building Upon Alaska Health Enterprise

Alaska Vision

- For Alaskans to be the healthiest population in America

Objectives

- Optimize State and Federal health programs, focusing on administrative efficiency and improving health outcomes
- Leverage investment in Medicaid systems for broader population
- Enable providers and other Alaskan caregivers to become more efficient and effective at delivering care in Alaska's challenging geography

Optimize Programs

- Realign focus of program administration toward controlling healthcare expenditures, improving population health outcomes and improving provider efficiency and effectiveness.
- In order to do this, core functions such as claims processing must work so well they fade from focus, allowing the broader view to materialize.

Leverage Medicaid's Investments

- Alaska Health Enterprise represents a technical platform enabling rapid future growth and expansion of the Medicaid program
- A single Health Information Exchange (HIE) and provider portal draws together key drivers – it is a single location for providers to manage all financial and clinical aspects of their work with the State

Enable Greater Provider Effectiveness

- Provide the right information to the right stakeholders at the right time
- Automate previously manual processes, shaping behavior toward best practice
- Tie performance drivers and outcomes to administrative processes that providers must complete anyway, such as checking patient eligibility
- Drive all processing to real time – eliminate retrospective clean up

Roadmap to Vision

- Implement Alaska Health Enterprise
- Establish program cost containment solutions
- Integrate with Alaska Health Information Exchange
- Deploy clinical best practices through Health Enterprise portal

Health Enterprise Components

EHR / HIE Components

Smart PA / Smart TPL

Pharmacy Management

Clinical Support

Provider Enrollment

Client Management

Claims Processing

TPL / COB

Benefits Management

Service Auth

Operational Reporting

MAR & SUR

Modernize PBM

Rx Auditing

Mediation Therapy Mgt

Pay for Performance

Pay for Outcomes

Health Enterprise Framework

Health Info Exchange

Electronic Health Rec.

E-Prescribing

Gap-in-care Analysis

Personal Health Rec.

Automated Prior Auth

Expanded Pre-Pay COB

Radiology / Ultrasound PA

Nurse Line – Care Mgt

ER Diversion

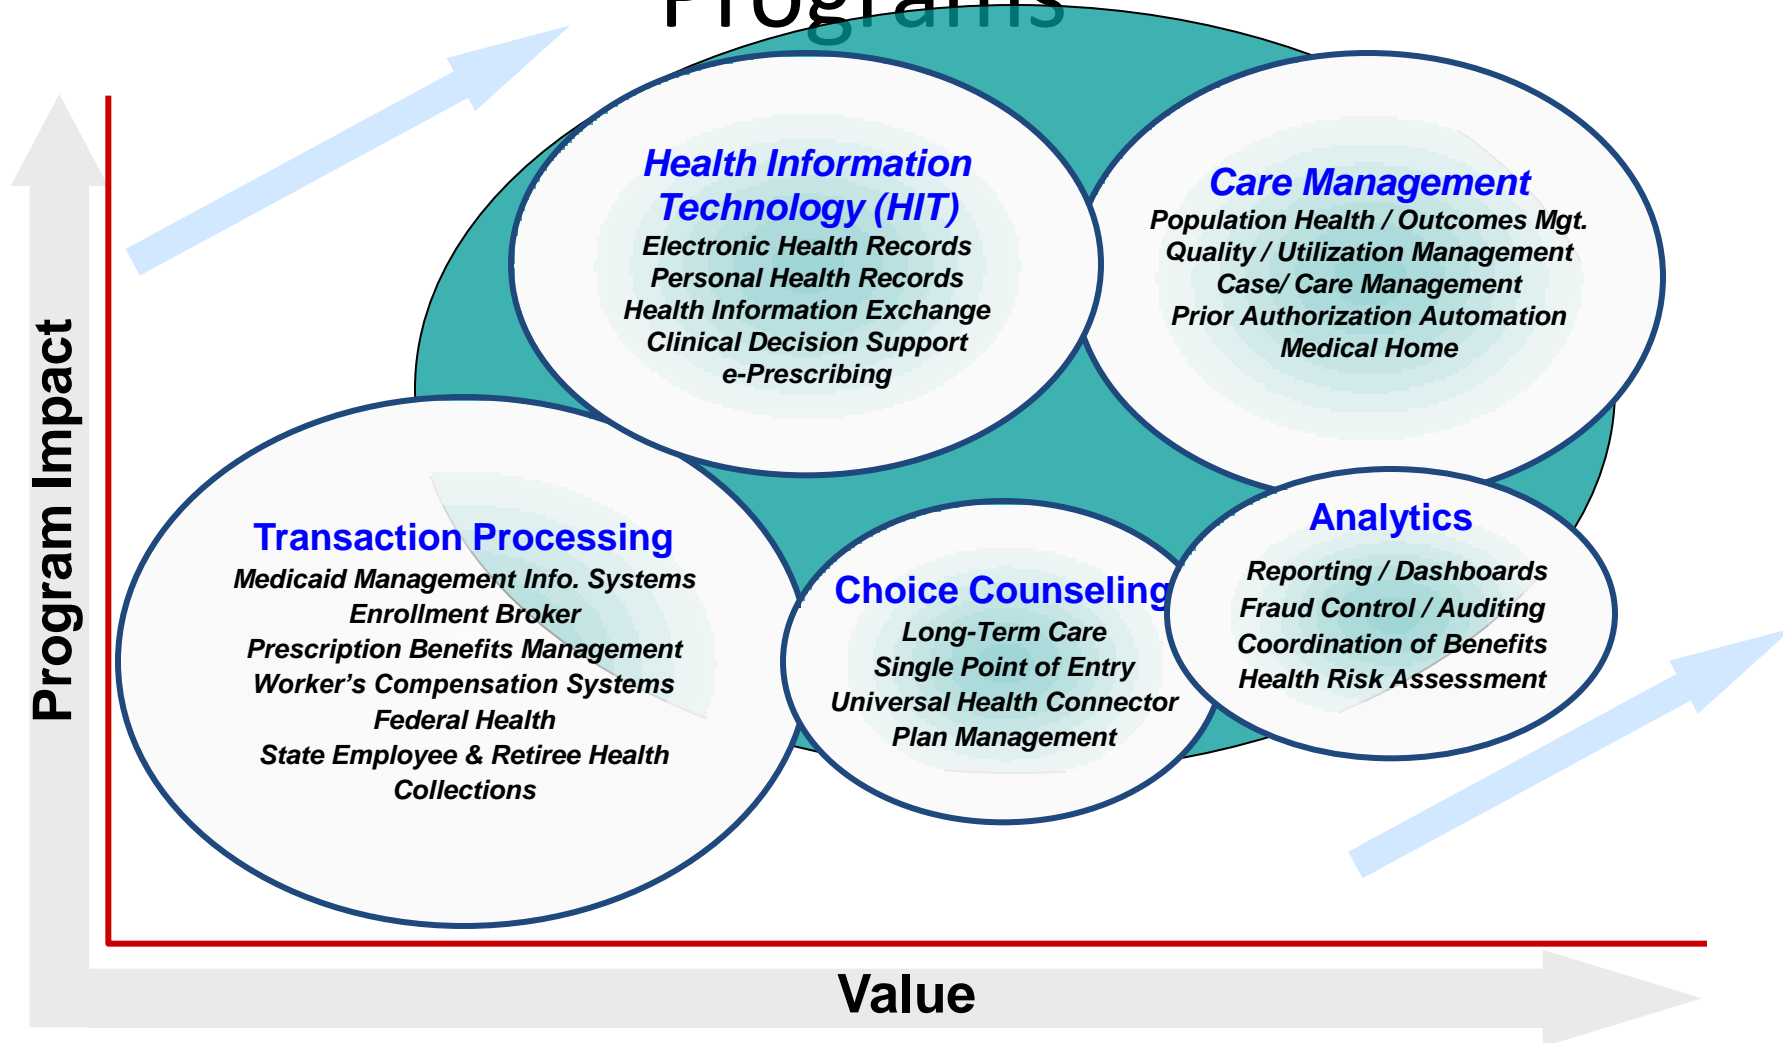

Care Planning / Discharge

Disease Management

Basic MMIS Functionality

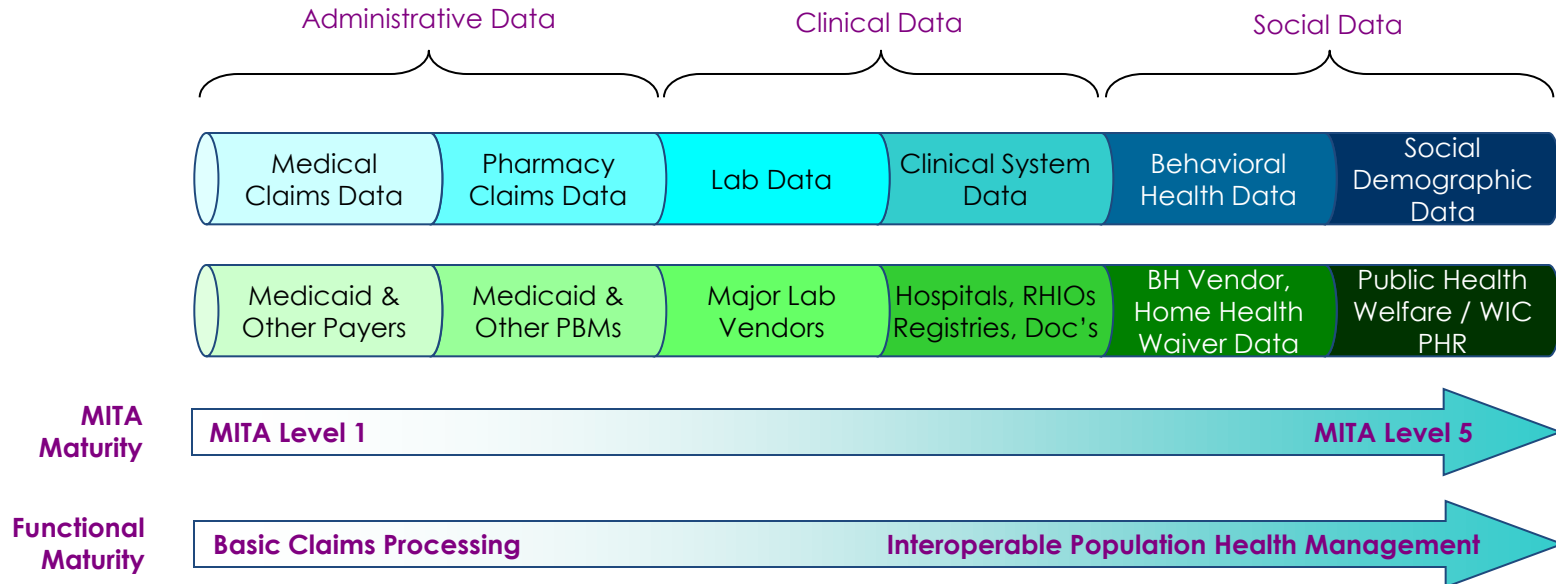

Realizing Complete Alaska Medical Village

Vision for Government Healthcare Programs

Understanding the Patient's Needs

Longitudinal Patient Record

Holistic, Person-Centered Care

Treatment Domains

Care Coordination

- Holistic approach
- Member and family participation
- Coordinated care
- Integration and linkage
- Member rights and responsibilities
- Safety of members
